

Encouraging Girls in Math and Science

Science experiments rock!

I'm gonna be a doctor.

I can figure it out!

Girls can do anything boys can do.

I love to discover new things.

Ability is Expandable
Teach students that the brain grows when they practice and learn new material.

Teaching Spatial Skills
Teach students spatial skills such as how to visualize and manipulate forms and shapes.

Prescriptive Feedback
Provide prescriptive, informational feedback on strategies and effort.

Female Role Models
Show students female role models to counter gender stereotypes.

Sparking Curiosity
Spark initial curiosity and foster long-term interest in math and science.
